Start

Install R and libraries

First you need to install R → **Click here for instructions**

We will use RStudio as the IDE to interact with R → **Click here for instructions**

We will need some libraries to process and analyse the data → **Click here for instructions**

Had problems with anything?

✓ → **That's unfortunate!** Please let us know what issues you're experiencing - we're happy to help troubleshoot.

- **Send us an email**
- **Make a post in the DevStart forum**

✗ → **Final checks**
To double check you R installation you can test it by running a small script

→ **Run the check**

Did everything go well? Did you see the OK message?

✗ → back to "That's unfortunate!"

✓ →

Well done!!!

You are officially one of us nerds now!!!!
